interrupt happed at 0x2222 so the cpu will store the address of the next instuction 0x333 and excute ISR

20812022100144

This address we assumed

20812022100144

After executing the ISR , the cpu will return to excute 0x3333 instruction

20812022100144

service هتعمله interrupt اي
Flag Bit Clear لأزم لعمل
بتاعته
MCU ديه قاعده ثابتة ف اي
to avoid Recursive Interrupt
